Would you like an estimate for today's services?

☐ Yes

☐ No

Pre-Anesthetic Bloodwork

Hamilton Plaza Animal Hospital recommends bloodwork for every pet regardless of age. Bloodwork is required for pets over eight years old.

This bloodwork helps detect internal problems that may not be evident during a physical examination.

Cost: \$143 or \$187

☐ Yes

☐ No

☐ Required

IV Catheter and Fluids

An IV catheter is required for every surgery patient. Pets over eight years old also require IV fluids, although fluids are recommended for every pet.

IV Catheter: \$50

IV Fluids: \$35

- ☐ Yes
- ☐ No
- ☐ Required

All pets must be current on vaccinations and heartworm testing.

Incision Protection

To prevent pets from licking or chewing at incision sites, each pet needs an e-collar or recovery suit.

All cats receive a soft e-collar for \$21.

Dogs may receive:

- ☐ Plastic E-Collar, \$21
- ☐ Recovery Suit, \$32

Additional Services

Microchip Placement, \$53

- ☐ Yes
- ☐ No

Post-Operative Sedative, \$25 to \$45

- ☐ Yes
- ☐ No

Histopathology for Mass Removal, \$168

- ☐ Yes
- ☐ No

Possible Additional Charges

- Spay while in heat: \$75 to \$150
- Spay while pregnant: \$125 and above
- Retained testicle during neuter: \$160 to \$225
- Hernia repair: \$110 to \$325
- Deciduous tooth removal: \$20 to \$45 per tooth

Hamilton Plaza Animal Hospital is a flea- and tick-free environment. If fleas or ticks are found on your pet, treatment will be provided at your expense.

Additional services or concerns for today:

I understand that risks are involved with any sedation. I also understand that complications resulting from sedation do not relieve me of my financial obligation.
